

ZENITHMIND PLUS

Quick Start Guide

Your Professional Edge. 8 Skills. One Profile.

For: ZenithMind Plus Members

Runs on: Claude Code — the Code tab in your Claude app

Setup time: ~5 minutes (after ZenithMind OS is complete)

ZenithMind Plus gives you **8 professional positioning tools** that read directly from the profile you built in ZenithMind OS. Every skill runs on your profile data — your Scorecard, Signature Profile, and Personal Instruction Manual are the engine.

Did you do ZenithMind through ChatGPT? All your data comes with you. Head to zenithpro.io, navigate to **ZenithMind OS 2026**, and check the **ChatGPT Migration** section in the Start Here tab. If not and you're a first-time user (which most of you are), just continue on.

First question: Have you completed ZenithMind OS? These skills require your completed profile data. If you haven't finished the base program yet — go to zenithpro.io, log in with your account, click the **ZenithMind OS 2026** card, and download the **Code** version. Complete the base program first, then come back here.

Yes — I've completed ZenithMind OS

If you completed ZenithMind OS in Claude Code, your profile data is already there. You just need to add your Plus skills.

- 1 Log in to zenithpro.io and find the **ZenithMind Plus** card. Click **Start Here**, then walk through the modules if you haven't yet. **Modules 4 and 5 have your Plus skills.**

- 2 Open **Claude Code** and tell it:

```
"I downloaded my ZenithMind Plus Skills and the zip is in my Downloads. Set it up and tell me how to use it."
```

Claude handles the rest — extracts the zip, installs the skills, and confirms everything is ready.

- 3 **Start with Unique Genius Discovery** — follow the path on Page 4.

Not yet — I haven't completed ZenithMind OS

These skills run entirely on your profile data — without it, there's nothing to power them. Your Scorecard, Signature Profile, and Personal Instruction Manual are the engine that drives every one of these 8 tools. Complete the base program first.

Step 1: Go to **zenithhub.ai** and select **ZenithMind OS** from "Choose Your Program." This walks you through getting Claude Code and Obsidian set up on your computer.

Step 2: Go to **zenithpro.io**, log in, and find the **ZenithMind OS 2026** card. Download the **Code** version.

Step 3: Complete all 4 lessons — it takes a few focused sessions. Then come back to this guide and pick up on Page 2.

NEED HELP?

Visit **zenithhub.ai** and select **ZenithMind Plus** from "Choose Your Program" for setup help and troubleshooting.

If you need additional help, email **mail@strategicprofits.com**. Don't spend more than 15 minutes on an error — that's what support is for.

You have 8 skills. They all work independently, but they're **dramatically more powerful in this order**. Each one builds on what came before it — your positioning sharpens your story, your story sharpens your credentials, your credentials sharpen everything you put in front of other people.

Our recommendation: Run skills 1 through 5 in order — they build your complete professional foundation. Skills 6 through 8 are situational tools you run whenever you need them.

BUILD YOUR FOUNDATION (RUN THESE IN ORDER)

1 Unique Genius Discovery

Cross-references 20+ frameworks from your Scorecard to find the thing only you can do. Produces a positioning statement for your website, pitch deck, and bios. **Start here — everything else builds on this.**

2 Story Sharpener

Takes your positioning and writes every version of your story — 50-word bio, about page, origin story, keynote opening, elevator pitch. Every place your story needs to appear, it's already written.

3 Credential Forge

Finds the authority you already have and packages it for whatever room you're walking into. Six deployment-ready angles for conferences, boards, podcasts, and pitches.

4 First Impression Fix

Audits your LinkedIn, bio, and pitch against who you actually are — then rewrites everything using your positioning, story, and credentials from steps 1-3.

5 Signature Scribe

Builds a Voice Calibration Map — how you argue, open, and close — then writes any of 13 document types in your voice: keynotes, proposals, executive summaries, and more.

USE ANYTIME (RUN THESE WHENEVER YOU NEED THEM)

6 Scouting Report

Run before any high-stakes conversation. Tells you what to lead with, where you'll trip up, and how to recover.

7 Network Playbook

Names who actually decides your next career move and gives you the exact approach for each one.

8 Reality Check

Run when you feel misread. Exposes the gap between how your industry sees you and what's actually true.

You can run any skill at any time — the path above is the recommended order, not a requirement. But if you follow it, each skill's output makes the next one sharper. The foundation you build in steps 1-5 makes the situational tools dramatically more effective.

HOW IT WORKS

Each skill produces a professional PDF report saved to your ZenithMind folder on your computer. Your data stays local — not in the cloud. Run a skill as many times as you want — each run can target a different situation, audience, or context.
